9th	10.0			9.9			9.2			11.2	9.9	

The results of the TerraNova Assessment Summary show that most of our students at Landmark Academy are at grade level or above in all subject areas. For example, the “Reading” column indicates that our 5th grade students tested at slightly above the 7th grade level. Areas that are not at grade level will be assessed so we can work toward raising our student scores above the normal standards. Student scores that are above the normal standards will be assessed individually in order to continually challenge each pupil.

Those answers in BOLD are this years, whereas the other numbers are from the 04-05 school year.
